FORWARD-LOOKING STATEMENTS

DISCLAIMER

Certain written and oral statements contained in this presentation and discussion are forward-looking within the meaning of certain securities laws and reflect the views of Algonquin Power & Utilities Corp. (the “Company”) with respect to future events, based upon assumptions relating to, among others, the performance of the Company’s assets and the business, financial and regulatory climates in which it operates. These forward looking statements include, among others, statements with respect to the expected performance of the Company, its future plans and its dividends to shareholders.

Since forward-looking statements relate to future events and conditions, by their very nature they require us to make assumptions and involve inherent risks and uncertainties. We caution that although we believe our assumptions are reasonable in the circumstances, these risks and uncertainties give rise to the possibility that our actual results may differ materially from the expectations set out in the forward-looking statements. Material risk factors include those presented in the Company’s annual financial results, the annual information form and most recent quarterly management’s discussion and analysis. Given these risks, undue reliance should not be placed on forward-looking statements, which apply only as of their dates. Except as required by law, the Company does not intend to update or revise any forward-looking statements, whether as a result of new information, future developments or otherwise.

NON-GAAP FINANCIAL MEASURES

The terms “adjusted net earnings”, “adjusted earnings before interest, taxes, depreciation and amortization” (“Adjusted EBITDA”), “adjusted funds from operations”, “per share cash provided by adjusted funds from operations”, “per share cash provided by operating activities”, “net energy sales”, and ”net utility sales”, (together the “Financial Measures”) may be used in this presentation. The Financial Measures are not recognized measures under GAAP. There is no standardized measure of the Financial Measures, consequently APUC’s method of calculating these measures may differ from methods used by other companies and therefore may not be comparable to similar measures presented by other companies. A calculation and analysis of the Financial Measures can be found in APUC’s most recent Management Discussion & Analysis. Per share cash provided by operating activities is not a substitute measure of performance for earnings per share. Amounts represented by per share cash provided by operating activities do not represent amounts available for distribution to shareholders and should be considered in light of various charges and claims against APUC.
Overview – Algonquin Power & Utilities Corp.

Clean Electric Power

Renewable power – high quality assets support earnings growth

- Since 1988
- Diversified energy markets
- 31% of 2017 EBITDA
- 45% Canada / 55% US
- C$2.3 B in net power assets
  - Net generation capacity of 1.2 GW
  - Long term contracted off-take
- C$2.4 B investment potential over the next five years

Regulated Electric, Gas and Water Utility

North American generation, transmission and distribution utility - predictable earnings growth

- Diversified state regulation
- 69% of 2017 EBITDA
- 100% U.S.-based

Distribution

- Electricity, natural gas and water distribution
- 782,000 customers
  - 262,500 electric
  - 337,000 gas
  - 182,500 water

- US$3.8 B in utility assets
- US$3 B investment potential over the next five years

Generation

- Net generation capacity of 1.3 GW
- Focus on growing percentage of renewable energy in fleet

Transmission

- Natural gas pipelines and electrical transmission
- Approximately 1,200 miles of electric transmission
- Approximately 100 miles of natural gas transmission
Our Strategic Objective and Financial Expectations

Strategic Objective
To be a top quartile North American integrated utility as measured by:

- Safety ♦ Customer Experience ♦ Employee Engagement
- Financial Performance ♦ Commitment to Renewable Energy

Financial Goals
- Dividend growth: 10% CAGR
- EPS and FFOPS: >10% CAGR
- Assets and EBITDA growth: >15% CAGR

Avenues for Growth
- Regulated utilities
- Contracted power generation
- Acquisitions
- Organic growth
- Canada
- United States
- Diversified modalities
- Local expansion

Numerous strategies available to ensure predictable, sustainable growth over the short, medium and long-term
North American Focus with Geographic Diversity

- Distribution
- Generation
- Projects in development
- Empire service territories
Liberty Utilities Offers Predictable Earnings and Growth

REGULATED UTILITY PORTFOLIO

- Stable, predictable earnings, strong cash flow, and return protection
- Diverse portfolio of natural gas, electricity and water distribution utility systems
- Excellent track record of growth
  - Investment in our existing systems
  - Accretive acquisitions in supportive regulatory environments
- Regulated ROEs 9% - 10%

Growth through diversified regulated utility acquisitions, organic investments and rate cases

13 states
100% U.S.
US$3.8 B net utility assets
782,000 gas, water and electric utility customers
C$3.9 B Investment Potential in Regulated Utilities

RENEWABLE ENERGY PORTFOLIO

- Attractive returns and strong cash flow from renewable and clean energy generation sourced from water, wind, solar, and natural gas
- 85% of generation under long term power purchase contracts with inflation escalators
- Six projects under development and construction with 511 MW of capacity
- Target unlevered after-tax IRR of greater than 8%

Renewable power generation providing attractive, growing returns
200 MW recently completed:

- **200 MW Odell Wind Project in Minnesota**
  - 20 year PPA with Xcel Energy subsidiary / COD in July 2016

160 MW under construction - C$430 M capital cost

- **10 MW Bakersfield II Solar Facility Expansion in California**
  - 20 year PPA with California electric utility / COD Q1 2017

- **150 MW Deerfield Wind Project in Michigan**
  - 20 year PPA with Michigan electric utility / COD Q1 2017

351 MW under development - C$920 M capital cost

- **75 MW Great Bay Solar Project in Maryland**
  - 10 year PPA with U.S. Government / COD expected in 2017

- **24 MW Val-Éo Wind Project in Quebec**
  - 20 year PPA with Hydro Quebec, community partnership / COD expected in 2017/2018

- **75 MW Amherst Island Wind Project in Ontario**
  - 20 year PPA with OPA / COD expected in 2018

- **177 MW Chaplin-Blue Hills Wind Project in Saskatchewan**
  - 25 year PPA with SaskPower / COD expected in 2019/2020
Safe Harbor Strategy: C$1.5 B Investment Potential

- Safe Harbor strategy capitalizes on 2016 PTC rates for future wind development
- Four-year development window
- Opportunity exists to deploy Safe Harbor turbines within both our regulated Utility and unregulated Clean Power businesses

**C$75 M**
PTC qualified wind turbines

**Up to C$1.5 B**
Up to 900 MW

Investment opportunity

*Locks in 100% PTC value for four years*
Evolution of Our Results Up to 2021

EBITDA Walk

- Liberty Utilities
- Renewable Energy

2021 Projected EBITDA split

- Wind: 26%
- Hydro: 43%
- Solar: 8%
- Thermal: 4%
- Natural Gas: 16%
- Energy: 4%

>15% CAGR
2016 - 2021

- Liberty Utilities – 67%
- Empire
Robust growth model

- Low dividend payout disconnects growth from capital markets
- Earnings/cash flow growth supports targeted dividend increase of 10% per year
- AQN now part of the S&P/TSX Canadian Dividend Aristocrats Index

Diversified, conservative business platform

- Long term investment grade BBB fixed rate debt financing
- Large proportion of earnings from regulated utility operations
- Reduced commodity price exposure through inflation indexed long term PPAs

1. Reflects 10% dividend increase declared January 16, 2017. Dividend declared in USD. CAD equivalent based on exchange rate on declaration date.

US$0.4659 / C$0.6132
Annual common share dividend\(^1\)

Room for investment in growth
Room to grow the dividend by 10% annually
C$9.7 B pipeline of investment opportunities, including C$3.4 B for Empire

High degree of financial flexibility to execute on growth plans
- Relatively low payout ratio provides significant internally generated cash flows
- DRIP program and tax equity provide additional sources of capital
- Equity rich capital structure allows for additional leverage
### Strong Performance to Date in 2016

**Delivered solid results**

- Two new generating stations fully contributing to financial results
- Diversified performance across portfolio
- C$11 million in incremental revenue achieved through rate cases
- Acquisition growth trajectory re-affirmed: Park Water acquisition closed, Empire acquisition approved, Odell commissioned

**Resource fluctuation managed through diversification**

- 10-year avg. production of >98% of forecast production targets
- Statistically predictable natural resources drive electricity production
- Production targets are based on long-term average wind, hydrology, and solar resources

**Other risk exposures actively managed to ensure stability of cash flows over the long term**

- Minimal counterparty risk
- Minimal refinancing risk
- Minimal floating rate debt risk
- Minimal commodity risk

¹ Proportions set as of September, 2016
Algonquin Power & Utilities Corp.: Why Invest?

- **Earnings & Cash Flows**
  - Long-term contracted cash flows and regulated utility earnings
  - Significant forecast growth from commercially secured pipeline

- **Dividend Growth**
  - Annual dividend increases for seven consecutive years
  - Targeting 10% increase annually

- **Development Program**
  - Line-of-sight on ~C$6.3 B\(^1\) of growth over next five years
  - Maintaining business and technology mix

- **Risk Management**
  - Investment grade capital structure
  - Dedicated risk and internal audit functions

- **Management Team**
  - Over 25 years of experience in power generation development and utility expertise
  - Entrepreneurial roots
