Audience Presentation

J.P. Morgan 2018 Energy Conference
June 18, 2018

All dollar amounts presented in USD, unless otherwise noted.
FORWARD-LOOKING STATEMENTS

DISCLAIMER

Certain written and oral statements contained in this presentation and discussion are forward-looking within the meaning of certain securities laws and reflect the views of Algonquin Power & Utilities Corp. (the “Company” or “APUC”) with respect to future events, based upon assumptions relating to, among others, the performance of the Company's assets and the business, financial and regulatory climates in which it operates. These forward looking statements include, among others, statements with respect to the expected performance of the Company, its expected growth and development projects, its future plans and strategic objectives, the effects of U.S. tax reform, and its dividends to shareholders.

Since forward-looking statements relate to future events and conditions, by their very nature they require us to make assumptions and involve inherent risks and uncertainties. We caution that although we believe our assumptions are reasonable in the circumstances, these risks and uncertainties give rise to the possibility that our actual results may differ materially from the expectations set out in the forward-looking statements. Material risk factors include those presented in the Company’s annual financial results, the annual information form and most recent quarterly commentary. Given these risks, undue reliance should not be placed on forward-looking statements, which apply only as of their dates. Except as required by law, the Company does not intend to update or revise any forward-looking statements, whether as a result of new information, future developments or otherwise.

All dollar amounts presented in USD, unless otherwise noted.

NON-GAAP FINANCIAL MEASURES

DISCLAIMER

The terms “adjusted net earnings”, “earnings before interest, taxes, depreciation and amortization (EBITDA)”, “adjusted earnings before interest, taxes, depreciation and amortization” (Adjusted EBITDA), “adjusted funds from operations”, “per share cash provided by adjusted funds from operations”, “Adjusted net earnings”, “per share cash provided by operating activities”, "net energy sales", and "net utility sales", (together the “Financial Measures”) may be used in this presentation. The Financial Measures are not recognized measures under GAAP. There is no standardized measure of the Financial Measures, consequently APUC’s method of calculating these measures may differ from methods used by other companies and therefore may not be comparable to similar measures presented by other companies. A calculation and analysis of the Financial Measures can be found in APUC’s most recent Management Commentary. Per share cash provided by operating activities is not a substitute measure of performance for earnings per share. Amounts represented by per share cash provided by operating activities do not represent amounts available for distribution to shareholders and should be considered in light of various charges and claims against APUC.

CHANGE TO U.S. DOLLAR REPORTING

Effective the first quarter of 2018, APUC’s interim and annual consolidated financial statements will be reported in U.S. dollars. Over 90% of APUC’s consolidated revenue, EBITDA, and assets are derived from operations in the United States. In addition, APUC’s dividend is denominated in U.S. dollars and the Company's common shares are listed on the New York Stock Exchange. The Company believes that the change in reporting to U.S. dollars will provide improved information to investors and allow for better assessment of its results without the effects of the change in currency on 90% of its operations.
Overview – Algonquin Power & Utilities Corp.

- Diversified independent power portfolio with average PPA length of >16 years\(^1\)
- U.S.$3.9 B in power assets\(^1\)
- International development strategy expands opportunity set
